

Rhino Super Flags

MARKING & PROTECTION SYSTEMS

Super flags are square or triangular and come either custom printed or with one color print. These tall flags are used for temporary marking in areas where there is tall grass and weeds that regular pin flags can't mark. Utilities use these to mark underground lines and to warn excavators of the 25-foot boundary and flow easement. The flags can also be used to mark plots and for highway construction projects.

Colors

Yellow, Orange, White

Material Specifications

The square flags are 10" x 10" and the triangular flags are 10½" x 12" x 12". The ¼" fiberglass rod is available in lengths of 4' and 5'. These flags are made of high visibility weatherproof 4 mil. plastic. The bright colors are fade resistant and are designed for outdoor use.
