

Rhino VentGuard™

Convert Vent Pipes Into High Visibility Markers

VentGuard slips over your existing vent pipe to create a highly visible pipeline marker that will never require painting. Rhino VentGuards meet or exceed the original vent area of 2", 3" or 4" IPS pipes.

Never Paint Again

VentGuard is a UV stabilized polyethylene and will not become brittle or significantly fade after years of use.

High Visibility Marker

A bright, fade resistant polyethylene sleeve combined with contrasting colored warning decals create a highly visible marker.

Improve Safety

Vent pipes are rigid and therefore are potential hazards to off road vehicles and equipment. Brightly colored VentGuards make them easier to see, reducing the chances of accidental impacts. Reflective bands can also be added.

Standard Sizes

Vent pipe size	VentGuard I.D.
2" IPS	2.50"
3" IPS	3.75"
4" IPS	5.00"

Standard Colors

VentGuard	Caps
White	Black
Yellow	Orange

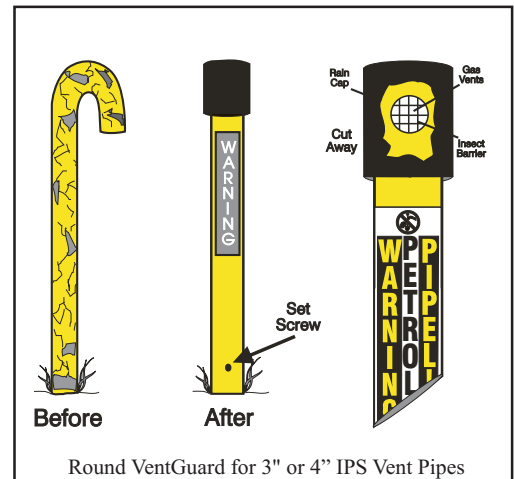

Custom Colors & Sizes

Both VentGuard and caps are available in any color or size with a minimum order.

EASY INSTALLATION

- ...Cut the top off your existing vent pipe.
- ...Slip the factory assembled VentGuard™ over the vent pipe.
- ...Install set screw through VentGuard™ into the vent pipe.
