

Product Fact Sheet

Super Grip Stake System

The Super Grip Stake's curled steel barbs lock your marker into virtually any soil. Simply drive the galvanized steel anchor into the soil. Use our extension sleeve to drive the barbs into the soil. After the anchor is in place you tap in the SoilMarker™ cap or our Orbital Forged Bronze or Aluminum Cap.

The SoilMarker cap is available with a wide variety of standard legends (see the SoilMarker Standard Warning Legend page), or virtually any custom legend. The UV stable SoilMarker cap is locked in place with a blank locking cap.

The Orbital Forged Bronze or Aluminum Cap can be stamped with any custom legend and locks directly into the stake.
